

HIV AND HISPANIC IMMIGRANTS IN THE SOUTH

Satellite Conference and Live Webcast

Tuesday, November 15, 2011; 2:00-3:30 p.m. (Central Time)
3:00-4:30 p.m. (Eastern) 1:00-2:30 p.m. (Mountain) 12:00-1:30 p.m. (Pacific)

In 2010, Hispanics represented 16 percent of the U.S. population, but they accounted for 20 percent of the total number of reported U.S. AIDS cases. Over the last decade many southeastern states more than doubled their Hispanic population. In light of the national comprehensive HIV planning initiative, prevention strategies must address the needs of diverse Hispanic populations. Program faculty will discuss Hispanic immigrant demographics specific to the south, and culturally relevant HIV programs and prevention models.

FACULTY

Robin Lewy

Director of Education
Rural Women's Health Project
Voices of Immigrants in Action (VIA)
Gainesville, Florida

Jonathan Drewry, MPH, REHS

Program Coordinator
AL/NC STD/HIV Prevention Training Center
UAB Division of Infectious Diseases
Birmingham, Alabama

Scott D. Rhodes, PhD, MPH

Professor and Section Head
Department of Social Sciences and Health Policy
Wake Forest University School of Medicine
Winston-Salem, North Carolina

PROGRAM OBJECTIVES

1. Describe demographic and HIV infection trends in Hispanic immigrants in the south.
2. Examine HoMBReS (Hombres Manteniendo Bienestar y Relaciones Saludables-Men Maintaining Well Being and Healthy Relationships) as a best-evidence HIV risk reduction intervention.
3. Identify barriers to HIV prevention in southern Hispanic immigrant communities.

CONFERENCE DETAILS

Target Audience: Nurses, social workers, HIV/AIDS coordinators and administrators
